

timate purpose of the training became inescapably explicit. In view of the Korean situation, Brothers Ellermets, Williams (Douglas), Boardman, and Vesty, saw fit to enroll in the program, and have all obtained the rank of sergeant or staff sergeant.

This past fall found a very high percentage of the freshmen entering the AROTC, and as a result, 17 Alpha Deltas are in the Air Force program; 3 in the Naval Reserve; making a total of 20 out of 28 associated with some branch of the service, notwithstanding two brothers who had seen service with the army prior to entering college.

While the world situation could be better, the House is making the best of it, and if our reserve sailors do not get called up, the House should be at full strength next fall.

FOUR BROTHERS TO BE GRADUATED.

Four of our brothers will be graduating this year. We of the active chapter wish these brothers much happiness and reward for their efforts during their stay at Union. The brothers who will be graduated are:

Richard A. Genthner, of Saugerties, New York, Chapter President and a Civil Engineering student. Dick has been very active in house and campus affairs and at the same time has managed to rank first in the class of graduating Civil Engineers. During his senior year, Dick became engaged to Miss Patricia Gardner, also of Saugerties. After graduation he plans to become married and either enter the service in the Navy or embark on a career with the Pennsylvania Railroad.

Charles W. Herman, of Schenectady, New York, an Economics major. Chuck married the former Miss Virginia Sherman of Demarest, New Jersey last summer, and has been living in Dutchman's village this year. Chuck is planning a career with the New York Telephone System after graduation. The chapter will certainly miss the presence of Chuck and Ginna at the House parties, but we look forward to seeing them back here from time to time in the future.

Richard A. Munro, of Tenafly, New Jersey, a science major. 'Orb' has been a former Chapter President and has been very active in the field of sports upon the college campus. He became engaged in his senior year to Miss Gloria Sweet, of Buffalo, New York, and plans to be married in June. Dick plans to go into sales work after graduation. We of the active chapter will certainly miss the steadying influence which Dick exerted upon those around him.

Thomas W. Odell, of New Hyde Park, New York,

an Electrical Engineering major. Tom is vice-president of the House and has been very active in campus activities. He has accepted an attractive job from Arma Corporation, an engineering firm located in New York City. We of the active chapter will miss Tom and his 'town car' which has provided many a brother with Saturday night transportation to Skidmore.

THE SOCIAL CALENDAR

The spring term at Union College has seen an active social calendar at Alpha Delta Phi. Paramount among the good times that have taken place since mid-term exams are, of course, the Winter and Spring Proms, with all their attendant fun. Winter Week-end embodied for the first time here what every student wanted--a 10¢ prom. It was decided to have a costume ball at the school gym Saturday night, with each fraternity decorating one section of the dance arena. The Delt Shop a 'Suppressed Desire' costume party, with everyone dressed as their secret ambition, and the contrast between 'alcoholics anonymous', dice cubes, and 'gentlemen of distinction' stimulated a wonderful evening. The freshmen are to be congratulated for their fine efforts in decorating the gym under the guise of 'Freudian Frenzies'.

Between Winter and Spring Proms, the Alpha Deltas continued their tradition of campus hosts. Weekly guest night saw many friends from the faculty and administration dining at the House. On several occasions, alumni Brothers dropped in for dinner and the fraternity meeting, which has been a big help in cementing alumni relations.

The highlight of the guest calendar occurred when Mr. Louis Untermeyer was our dinner guest at the house. Mr. Untermeyer, famed poet, anthropologist, lecturer and critic, really entertained the Brothers, rather than vice versa, with his ready wit and human approach to 'intellectualism'. He spoke about many subjects and showed a keen appraisal of all types of music, enthusiastically supporting both Dixieland jazz and classical pieces. Incidental to his visit to the House, Mr. Untermeyer was a guest of the college for nearly a week, disrupting classes with his casual criteria of criticism ('I like it', or 'I don't'), and lecturing the student body.

Spring week-end, just past, featured Tex Beneke and his band at the Friday night formal. Over the whole week-end, the Deltas kept a fast and steady pace of fun and revelry, enjoying to the fullest the brief influx of females. The
